Outline

1 Motivation

2 Ideas for Grenoble

3 About Me

My Experiences

- 1988-2013 : Berlin
 - school :
engaged in environmental protection and sustainability projects
 - university :
engaged for free (as in libre) software
 - attendend some international non-commercial conferences
 - got interested in Human Rights / Amnesty International
- 2012 - now : Travelling in Europe and Central America
 - frustation about Politics in general and EU crysis in particular
 - environmental and privacy protection seems to get even worse
- 2013 - 2015 : PhD student in Marseille

Personal Agenda (subject of change)

- create of a global network of experts to prepare the break-down of our society¹
- promote/support of international exchange
- raise political interest/participation
- wait for the world revolution 05.07.2023²

Maybe I'm exaggerating a little bit, but people are nowadays used to superlatives.

¹As recommended by people from chaos computer club (CCC)

²If things are getting worse we have to make it happen earlier !?

World Revolution

This flyer got distributed in Heidelberg. Went to Spain. Than to Latvia where we picked it up to take it to Berlin. The website might be offline, but the idea is hopefully not.

Chances – Problems

I hope that on the week-end of campus there will be a lot of active people around. So let's take the opportunity to discuss some of the big problems of this century, i.e.:

- divergence between rich and poor
- unemployment / full employment as a goal
- raising nationalism
- world hunger
- climate change
- incompatibility of sustainability and a growing economy³
- Vulnerability of Human Rights / Democracy

³This might be subject of discussion.

What I Can Offer I

Discussion Panels

- I could support you in organising a discussion panel about any of these topics I mentioned already.
- I could try to invite an expert.
- I could give an introduction talk (in german, english, and on request in french?).

What I Can Offer II

Methods Training

- I could give an introduction to Free Software including a hands-on workshop.
- I could do a workshop on privacy protection in the internet including a do-it-your-self part to learn how to encrypt like Edward Snowden and Glenn Greenwald are practicing it¹

¹If you haven't heard of these names, you've done something wrong in 2013. ;)

Contact

That's me.
